

# COLD FORM BUILDINGS

Zee-shaped member

Cee-shaped member

## WHAT IS COLD FORMED

*Construction material produced by shaping steel sheets or coils without heat treatment during the production process. Cold Formed Buildings are produced with cold-formed primary and secondary structural members.*

## FOUNDATION

- Cold form buildings bolt to the foundation using steel base plates and drill in anchors which are included with package
- Foundation drawings are supplied
- Requires less concrete than I-beam construction

## GALVANIZED FRAMING

The cold formed materials come with a galvanized finish.

## QUICKER LEAD TIMES

**Drawings:** 1 week\*

*\*(unless special engineering is required)*

**Delivery:** 6-weeks from the time of order
